Re: Riverside Industrial Park Superfund Site, Newark, New Jersey: Administrative Settlement Agreement and Order on Consent For Remedial Investigation and Feasibility Study – CERCLA Docket No. 02-2014-2011

Dear Mr. Krall:

The U.S. Environmental Protection (EPA) has reviewed PPG Industries Inc.'s (PPG) submittal entitled "Final Feasibility Study Report, Riverside Industrial Park Superfund Site, July 17, 2020" (July 2020 FS). PPG prepared and submitted the document pursuant to the Administrative Settlement Agreement and Order on Consent, or ASAOC, Docket No. CERCLA-02-2014-2011, for the remedial investigation/feasibility study at the Riverside Industrial Park Superfund Site.

In accordance with Paragraph 41 in Section X of the AOC, by letter dated June 23, 2020, EPA conditionally approved a draft of the report entitled "Feasibility Study Report, Riverside Industrial Park Superfund Site, June 8, 2020" (June 2020 FS). EPA's approval was conditioned upon PPG's incorporation into the final FS report of language provided by EPA on June 23 in a mark-up of the June 2020 FS, to cure deficiencies identified by EPA in the June 2020 FS.

The July 2020 FS provided by PPG on July 17, 2020 did not cure the deficiencies identified by EPA in PPG's June 2020 FS submittal. Therefore, the EPA has modified PPG's submission to cure the deficiencies in accordance with Paragraphs 41(c) and 44 of the ASAOC.

This final report will be added to the Administrative Record file for the Riverside Industrial Park Superfund Site. No further action is needed regarding the report. If you have any questions I can be reached at (212) 637-4302 or smeraldi.josh@epa.gov.

Regards,

Josh Smeraldi
